The Heisenberg Hilarity Principle: Uncertainty, Comedy, and the Absurdity of Punchlines

Authors Charles Darwin, Rosalind Franklin, Werner Heisenberg

Abstract In the realm of comedy, the mechanism behind generating laughter has long eluded scientific scrutiny. However, recent advances in the field of quantum humor dynamics have shed light on the enigmatic nature of jokes and punchlines. In this paper, we propose the Heisenberg Hilarity Principle, which posits that uncertainty and absurdity are fundamental to the comedic experience. By applying principles from quantum mechanics to the study of humor, we explore the intricate interplay between setup and punchline, where the observer's expectations are momentarily suspended before being subverted with a surprising twist. Utilizing a multidisciplinary approach, we analyze various comedic techniques, such as wordplay, incongruity, and surprise, through the lens of quantum superposition and entanglement. Furthermore, we examine the role of timing, delivery, and context in the generation of comedic uncertainty. Our findings suggest that humor arises from the delicate balance between predictability and surprise, with punchlines acting as quantum collapses of expectation. We anticipate that the Heisenberg Hilarity Principle will not only deepen our understanding of the fundamental nature of comedy but also provide new insights into the human experience of laughter, paving the way for innovative approaches in joke construction, stand-up comedy, and beyond.

6. 下にスクロールしますと、二つのタブ (Guidance / Your report) が表示されます。
Guidance を確認し、Your report のタブをクリック。

The screenshot shows a web interface with a navigation bar at the top. On the left, there is a tab labeled "Guidance" with a circular icon. On the right, there is a tab labeled "Your report" with a document icon, which is highlighted with a red rectangular box. Below the navigation bar, the "Guidance" section is displayed, starting with the heading "Guidance" and a horizontal line. The content includes a thank-you message, three numbered sections: "1. Get started", "2. Writing your report", and "3. Submitting your report", each with descriptive text. A mouse cursor is visible over the "2. Writing your report" section.

Guidance

Thank you for agreeing to review.

1. Get started

To start your review, download all the relevant files from the download link above.

2. Writing your report

The feedback you include in your review report will be shared with the manuscript author(s). Please keep it constructive and professional. To keep the review anonymous, please don't include your name in the report.

We reserve the right to remove any inappropriate language from your report.

3. Submitting your report

There's a page in the form where you can share confidential feedback with the Editor. You can use this page to address any sensitive topics you don't want to share with the author(s). Before you submit your report, please review it to make sure it's a complete and thorough review.

7. Your report には 3 つのセクションに操作が分かれています。

7.1 Feedback for the author(s)

このページから著者へのコメントを追加します。コメントファイルをアップロードするか、直接コメントを記入することができます。

Feedback for the author(s)

* Indicates a required field

- Your review should be constructive and thorough to allow the authors to prepare a revision ready for acceptance.
- If recommending rejection, you should explain why the submission does not meet our editorial criteria for publication.
- To keep the review anonymous, please don't include your name in the report.
- You can upload a file with your comments for the author(s) or include them in the text box below.

Please remove any mentions of your name from your files' metadata before uploading. [How to remove file metadata?](#)

Review file(s)

Please, upload all the relevant review files. We only support files **up to 2GB**.

*** Your recommendation**

Accept Reject Revise

If recommending a revision, please give clear and constructive advice that enables the authors to prepare their manuscript so that it's ready for acceptance – without requiring multiple rounds of revision.

* Is the study design appropriate to answer the research question (including the use of appropriate controls), and are the conclusions supported by the evidence presented?

Yes

No, but the points can be addressed with revisions

No, there are fundamental issues that cannot be addressed

* Please rate the novelty of the research on a scale of 1-5 (1=not at all novel and 5=extremely novel)?

Least novel 1 2 3 4 5 Most novel

* Are the references provided appropriate and up to date?

Yes

No

Comments to the Editor (optional)

Please note, comments added to this box are **confidential** and will not be shared with the author.

Consider including:

- Ethical concerns regarding experiments
- Concerns regarding any disclosed conflict of interest
- Concerns regarding plagiarism or publication ethics
- Any additional comments to enable the Editor to assess the revisions you have requested
